

## PHP Developer - Sydney

### THE COMPANY

Market United [a wholly owned subsidiary of ASX:QXQ] is a full service online agency, with offices in Sydney, Perth and Auckland. We offer an innovative environment to practice your craft. This role will be working specifically for our in-house digital assets (qedigital.com) developing an ad network and community websites and email lists.

### THE ROLE

QEDigital.com is looking to expand its development team and this could be the unique opportunity you have been looking for.

We are looking for a skilled developer who can be innovative and solve a wide range of development challenges. You'll be involved in designing, analysing, building and maintaining a range of cutting edge web applications including behavioral targeted ad network, large membership sites, online reward programs, large scale email communication systems and online marketing tools. Other developments will cover social media like Facebook and devices like iPhones.

### THE RESPONSIBILITIES

- Designing and building PHP/My SQL websites & systems to functional specs.
- Delivering projects on time and according to agreed specifications.
- Scripting and managing testing procedures

### YOU ARE

- A problem solver with good organisational skills
- Passionate about the internet
- A team player who will go the extra mile to do a good job

### YOU HAVE

- Tertiary qualifications with good grades in Computer Science or related discipline.
- 4+ years web development experience in Linux/Unix development
- Experience
- Excellent written and verbal communication skills
- Excellent knowledge of: HTML, PHP5, Javascript, MySql, and website , browsers, design.  
Excellent knowledge of Linux based environments and Amazon Web Services
